

MEMOR™ 10 PDA DARE TO BE SMART!

OVERVIEW

On January 11, 2019, Datalogic publicly and proudly announced the new Memor™ 10, one of the most advanced and competitive devices on the market, and one of the first mobile computers to enter the 'Android Enterprise Recommended' program by Google for rugged devices!

Following the announcement, Datalogic received an extremely high volume of orders from partners and customers globally, resulting in an increased lead time for the device and accessories. We also have a situation where some of the accessories original GA date was unexpectedly slipped due to unforeseen delays in certifications or component availability.

The team is fully aware of the situation and is working around the clock to improve and deliver as soon as possible the orders already received, but also accelerate availability for new orders incoming. *The goal of this bulletin is to officially communicate the latest availability dates for the main models and accessories for this very exciting product line.*

DEMO KITS

Datalogic is introducing some promotional kits bundling the Memor 10 device together with its Single-Slot Dock, Power Supply, Handle and Rubber Boot. Such kits offer an 'All-In-One' solution for Datalogic partners and customers, but especially can also represent a nice tool for promotional and sales activities
